

Attorney Docket No. 990253

REMARKS

Claims 1-21 were rejected under 35 U.S.C. § 112, first paragraph, for allegedly failing with the written description requirement.

The Action states that the essential material "integration interval and noncoherent passes" is incorporated by reference. Applicants note that this material is described explicitly in the present application, without need for incorporation by reference, at page 8, lines 17-20, page 10, lines 30-31, page 15, lines 3-5, page 17, lines 18-20, and a specific example described at page 13, lines 27-29. The concepts of "integration interval" and "noncoherent passes" are commonly used in wireless communication systems such as CDMA systems and hence would certainly be familiar to one of ordinary skill in the art of wireless communication system design. Accordingly, Applicant submits that the present application satisfies the written description requirement and the rejections under 35 U.S.C. § 112, first paragraph, are improper and should be withdrawn.

Please charge any fees or overpayments that may be due with this response to Deposit Account No. 17-0026.

Respectfully submitted,
